

From the office of Mr Quentin Raffles, Watson Games

-----

Q) It is known that a property can be sold to the bank to pay off a debt to a player, but can a player sell an un-mortgaged property back to the bank? If so, do they get 100% of the price they bought it for? Or does a player have to mortgage the property first.

A) If the property is sold unmortgaged back to the bank, then the player receives 100% of the original purchase price for that property.

Q) If a player decides not to buy a property, are they still allowed to be part of the auction for that property?

A) No, the player has already decided that they did not wish to purchase the property, so that would not be in the spirit of the original game.

Q) We would like to have a clarification on session 3 item 16. It stated:

*"When a player has finished moving their token, and has completed any property purchase activity, they have the option to buy houses and hotels to improve their properties. Players are not permitted to improve their properties at any other time."*

It means that when a player has arrived a property that has already purchased, then have the option to buy houses and hotels, or it means that when a player has finished the process of purchasing the property, the player can immediately have an option to purchase houses or hotels.

A) The player can purchase houses and hotels at the end of their turn. They do not need to be one that property space to buy houses and hotels.

Q) In addition, are there any limit of houses and hotels that can be bought at one time?

Though it has limited the difference of houses between the colour group set, it is possible that a player can purchase 2 houses at the same time without breaking the limit.

A) The maximum houses on any one property is 4. The maximum number of hotels on any one property is 1.
